## Stay connected to key Act! Premium details

when on the move with Act! Companion—a native mobile app designed for your iPhone or Android<sup>1</sup>.

### Modern, new Connections

Modern, new Connections extend the power and reach of Act! Premium. **Act! Companion**—a native mobile app designed for your iPhone or Android<sup>1</sup>—keeps you connected to key Act! Premium details when on the move. Get alerts for upcoming activities, easily capture notes during meetings, and email or call your Act! Premium contacts from the app. Do work in a social way with @mentions and simple text updates to expedite entry from your phone. Best part, intelligent notifications sent directly to the home screen of your phone keep you on task and on time.

**Act! Premium Contact Link** helps you streamline your workflow between Act! and Outlook. Create new Act! Premium contacts or edit existing contacts. View and interact with the details of past activities, or create and schedule new activities with your contacts. Even attach the text of an Outlook email to your contacts. Do it all from within Outlook!

No web server, no problem! You can leverage these Web API-based connections as a Windows user too with **Act! Connect Link**. Even benefit from improvements to the Web API platform for deeper access to Act! Premium data and functionality, and ultimately more powerful integrations.

Work with the Microsoft products you rely on every day, because Act! Premium is now compatible with 64-bit editions of Microsoft Office 2016, 2013, and 2010.

# Performance & campaign management improvements

Performance improvements to Act! emarketing not only reduce the time it takes to send email campaigns, but also ensure large campaigns send successfully. Now you can send Act! emarketing campaigns up to 5 times faster!

Campaign management improvements help you work more efficiently. Get instant feedback on your current Act! emarketing service level, including live details about your contact limit, usage this month, and new recipients in the selected campaign to avoid sending campaigns that exceed your current monthly send limit. Quickly and easily see email campaign history for a given contact, because a new campaign history overwrite ensures each email campaign creates and updates just one history entry per Contact Record. Finally, don't worry about accidental sends, a send confirmation dialog will now check to make sure you're ready to send an email campaign.

# Customer-driven feature enhancements

Customer-driven feature enhancements make Act! Premium even easier to use. Enjoy 30+ refreshed standard reports with more relevant fields, along with default filters and sort orders that help you get the information you need quickly. A new file type ensures any existing custom reports you have stay safe. Last, consistent field references and data formatting make reports easier than ever to customize.

But, that's not all. Benefit from our ongoing commitment to best-in-class usability with hundreds of quality updates driven by feedback from customers.

Enjoy 30+ refreshed standard reports that help you get the information you need quickly.

Good news for Act! Premium for Web and Act! Premium Cloud users! You can now use functionality previously only available in Windows. Scan for duplicates helps you better manage the integrity of your data and more effectively deal with duplicate records. The formatting toolbar in the layout designer gives you further flexibility to customize screen layouts.

## What's new since your version
