

The leading mobile solution
for Act!

Handheld Contact puts your business critical Act! data at your fingertips, anywhere, anytime, allowing you to manage all your contact & calendar details on your mobile device, even when you're offline.

New Features

- NEW Home screen for easy access to all Handheld Contact features.
- NEW “search” feature that allows mobile users to create look-ups with up to ten fields, and save them for use later.
- Send email blasts from Handheld Contact to your look-ups, while recording the History to the contacts.
- User Interface (UI) enhancements to further replicate the Act! experience on the mobile
- NEW “Favourites” button that allows users to quickly access the contacts they call most, while preserving the Act! History tracking they've come to rely on.

One subscription provides one device with:

- ▶ Unlimited data syncing
- ▶ Unlimited quality online support
- ▶ Free installation, setup, and software upgrades

Supported mobile devices:

- ▶ Apple iPhone and iPad
- ▶ Android smartphones and tablets

Definitive Mobile Solution for Act!

- Automatic, wireless syncing keeps data on the mobile device up to date.
- Offline access so you're never left hanging.
- Track every interaction: Includes calls, e-mails, and sms.
- Alarms that keep you in the loop and alert you using your device's notification system.
- Know who's calling before you answer with Caller ID.
- Record every detail with Voice To Text.
- The only solution designed for Act! and respects relationships between contacts, notes, histories, and activities.
- Helps maintain a high level of data integrity.

Powerful Act! Features

- Customize which standard and custom fields sync.
- Create and manage contacts, activities, notes & more.
- History is automatically created after a call is placed or an e-mail is sent.
- Makes scheduling a follow up after a phone call or e-mail hassle-free.
- Clear activities and schedule follow ups for one or many people.
- Quickly place calls and send e-mails directly from activity records.
- View and edit other Act! users' activities.
